SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Clear or pigmented liquid. Will support combustion. May cause complications if swallowed. Avoid skin contact. Inhalation of mist or liquid can cause respiratory irritation.

POTENTIAL HEALTH EFFECTS

INHALATION: No significant adverse health effects are expected to occur upon short-term exposure. Prolonged exposure to mists may cause an allergic reaction. Mists are defined as liquids that are in vaporous form. This would not be how the material is designed to be used or applied.

SKIN: No allergic reaction is expected to occur upon short term exposure. Individuals who are known to have allergies to acrylics, acrylic acids, carboxylic acids, epoxy resins or other UV cured products should avoid skin contact.

EYES: No adverse effects are known for this product upon short-term exposure to the eyes. It is best to avoid contact with the eye region and surrounding skin.

CARCINOGENICITY:	NTP?	NO	IARCH MONOGRAPHS?	NO	OSHA REGULATED?	NO
-------------------------	------	----	-------------------	----	-----------------	----

Known to **not** be a **carcinogen**.

SECTION 4 - FIRST AID MEASURES

INHALATION: In case of exposure to a high concentration of vapor or mist, remove person to fresh air. If breathing has stopped, administer artificial respiration and seek medical attention. There has never been any incidence of any inhalation incidence known to the manufacturer.

SKIN: Remove contaminated clothing and wash contact area with soap and water for 15 minutes. Particular attention should be paid to hair, nose, ears and other areas not easily cleaned. See section 8. Note to physician: effects can be delayed 24-48 hours.

EYES: Flush with plenty of water for at least 15 minutes and seek medical attention.

INGESTION: If appreciable quantities are swallowed, seek medical attention.

SECTION 5 - FIRE FIGHTING MEASURES

GENERAL HAZARDS: Product will support combustion. Products of combustion will include compounds of carbon, nitrogen and oxygen including carbon monoxide.

EXTINGUISHING MEDIA: Carbon dioxide, water fog, dry chemical and chemical foam.							
FIRE FIGHTING PROCEDURES: Firefighters must wear a full-face self-contained breathing apparatus in positive pressure mode. Do not use solid stream of water since stream will cause fire to scatter and spread fire. Fine water spray can be used to keep fire-exposed containers cool.							
UNUSUAL FIRE AND EXPLOSION HAZARDS: Closed containers can explode due to build-up of pressure due to extreme heat.							
HAZARDOUS COMBUSTION PRODUCTS: Smoke, fumes, oxides of carbon, nitrogen containing compounds.							
SECTION 6 - ACCIDENTAL RELEASE MEASURES							
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: WILL SUPPORT COMBUSTION. Do not wash to sanitary sewer. All spills can be polymerized into a plastic with the use of UV light source: sunlight, UV light lamp. If no light source is readily available, use a trowel or shovel to gather the material into a container, transport to a UV light source and polymerize. Polymerized material can be disposed of in accordance with local, state and federal regulations.							
SECTION 7 - HANDLING AND STORAGE							
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Keep container closed when not in use. Protect containers from abuse. Do not expose containers to UV light (including sunlight), peroxides or other free-radical reaction initiators. Do not expose material to temperatures in excess of 60 °C. Do not expose to open flame. This material will support combustion. Keep this material and all chemicals out of the reach of children. Avoid prolonged contact with skin, mucous membranes, eyes and open wounds.

acetone	1000	1000					750
PERSONAL PROTECTION: use a respirator equipped with organic vapor cartridges when working with large quantities in confined spaces or if the user begins to feel light headed.							
RESPIRATORY PROTECTION (SPECIFY TYPE): None required while threshold limits are kept below maximum allowable concentrations; if TWA exceeds limits, NIOSH approved respirator must be worn. Refer to 28 CFR 1910.134 or European Standard EN 149 for complete regulations.							
PROTECTIVE GLOVES: Nitrile, neoprene, or latex. For large quantities, long neoprene glove are required with cuffs.							
EYE PROTECTION: Safety glasses or splash goggles. For large exposure situations, a full-face splash shield is required.							
OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Safety eyewash station.							
WORK / HYGIENIC PRACTICES: Always practice safe workplace habits. Minimize body contact with this as well as all chemicals in general.
